

A concentrated, "oil splitting" formulation for pressure cleaning in a water reclamation environment. It contains a unique detergent system that allows oils to rapidly "split off" from the cleaning solution.

### Where To Use

Garages                      Fleet Cleaning                      Construction Equipment  
Dump Trucks              Pressure Washing              Water Reclaim Systems

### Dilution

General - 1/40 (3 oz./gallon)  
Heavy-duty - 1/20 (6 oz./gallon)

### Directions

For pressure cleaning, set machine to dilute according to dilution table above. Apply solution to a workable area being sure to concentrate the product on the heavy soiled area. Let solution dwell to allow the grease cutting ingredients to loosen soil. Agitate with a soft bristle truck brush if necessary. High pressure rinse with hot water. Detergents used with reclaim systems should be diluted with fresh water whenever possible. This will ensure that the solution will work optimally.

### Technical Specifications

COLOR:.....	Transparent	VISCOSITY: .....	Water thin
FORM:.....	Liquid	STORAGE(Unopened):..	1 Year @R.T.
SCENT: .....	Odorless	BIODEGRADABLE: ...	Yes
pH: .....	13.2	WEIGHT/GAL: .....	8.7 lbs.
FLASH POINT...	None	SHIPPING CLASS: .....	None
FOAM: .....	Low	PACKAGING: .....	5 gal, 55 gal
TYPE: .....	Oil Splitting Pressure Washer Detergent
