

Tannin, Rust, Iron and Mineral stain remover.

Where To Use

Commercial Laundries
Nursing Homes
Restaurants
Sports Teams

Dilution

As is.

Directions

Separate items requiring spot treatment. Treat stains as soon as possible, as recent stains are more easily and effectively removed. Test fabric for dye stability by applying a small amount of Prespotter to an inconspicuous area of the fabric. Apply Prespotter directly onto the stain, rub undiluted product into soiled area. Wait 5 minutes before laundering.

Follow safe handling procedures when using all chemicals – wear appropriate personnel protection. Refer to product SDS for further instructions and safety procedures.

Technical Specifications
